Introduction

The 2017 *English Standards of Learning* Curriculum Framework is a companion document to the 2017 *English Standards of Learning* and amplifies the *English Standards of Learning* by defining the content knowledge, skills, and understandings. The Curriculum Framework is not meant to be an entire curriculum, but rather to provide additional guidance to school divisions and their teachers as they develop their local program of studies appropriate for their students. It assists teachers in their lesson planning by identifying essential understandings, defining essential content knowledge, and describing the intellectual skills students need to use. This supplemental framework delineates in greater specificity the content that all teachers should teach and all students should learn. The concepts, skills, and content in English Language Arts spiral. Teachers should note each grade level builds skills that carry to the following grades. Each grade level within the English Curriculum Framework builds from kindergarten through grade 12 creating a comprehensive instructional tool, which prepares students for success in the postsecondary education and the workplace. Teachers should review the Curriculum Framework for the scope of learning in each of the strands in previous grades and in the grades to follow. The format of the Curriculum Framework facilitates teacher planning by identifying the key concepts, knowledge, and skills that should be the focus of instruction for each standard. The Curriculum Framework is divided into two columns: Essential Understandings; and Essential Knowledge, Skills and Processes. The purpose of each section is explained below.

Teacher Notes

This section includes background information for the teacher. It contains content that may extend the teachers' knowledge of the standard beyond the current grade level. This section may also contain best practices, instructional strategies, and suggestions that will help teachers plan lessons focusing on integrating ~~on~~ the standard(s). The Teacher Notes are found at the beginning of each strand in the English Curriculum Framework.

Essential Understandings

This section delineates the key concepts and ideas that all students should grasp to demonstrate an understanding of the Standards of Learning. These essential understandings are presented to facilitate teacher planning.

Essential Knowledge, Skill, and Processes

Standards are expanded in the Essential Knowledge, Skills, and Processes column. What each student should know and be able to do in each standard is outlined. This is not meant to be an exhaustive list nor a list that limits what is taught in the classroom. It is meant to identify the key knowledge, skills, and processes that define the standard. The Essential Knowledge, Skills, and Processes is not a one-to-one match of the Standards. If the standard is self-explanatory, there will be no additional explanation in this column. For example, the nonfiction reading strand requires students to identify the main idea; there is not a corresponding entry in the EKSP column explaining how to identify a main idea.

The Curriculum Framework serves as a guide for Standards of Learning assessment development. Assessment items may not and should not be a verbatim reflection of the information presented in the Curriculum Framework. Students are expected to continue to apply knowledge, skills, and processes from Standards of Learning presented in previous grades as they build expertise in English.
