Tips for VoIP phones

- When you call a person and their voice mail comes on, you can skip the message by pressing # key. You will go directly into voice mail.
- When you are already on the phone and another call is incoming, two choices appear on the softkeys: “answer” or “IDivert.”
 - “Answer” automatically puts the first caller on hold to answer the second call and then “resume” takes you back to the first caller.
 - “IDivert” will send the second caller directly to your voice mail.
- You do not have to dial a special number to get your voice messages; just hit the message key.
- To redial a number from your directories list (10 digit number), hit the “edit” button and press “9” and then press dial.
- You may redirect your VoIP phone to any other number. Press the “CFwdALL” and enter “9” and the number you wish your calls to be forwarded to. The screen will display the forwarded number.
- DND = do not disturb. Your calls will go directly to your voicemail. The screen will show you have DND active.
