FACILITIES DEVELOPMENT

Telecommunication Facilities on School Property

The Prince William County School Board may enter into leases or grant easements for the placement of telecommunication facilities on school property if the School Board determines that the use of the leased property benefits the School Division and is consistent with good business judgment and sound business principles.

In determining whether the placement of a telecommunication facility benefits the School Division and is consistent with good business judgment and sound business principles, the School Board shall review those criteria set forth in Regulation 892-1, and any other facts which the School Board deems relevant to its decision.

Telecommunication facilities must be consistent with the Prince William County Comprehensive Plan and comply with all local, state, and federal requirements. Such facilities may be considered for school sites where adequate space exists, where such facilities may be integrated into currently existing vertical structures, and where such facilities will not interfere with the educational mission of the School Division. Such facilities shall be limited to middle school and high school sites and shall not be installed on school buildings.

Any lease or easement permitting the placement of telecommunication facilities on School Board property must be approved by staff and reviewed by the Division Counsel before the School Board takes action thereon.

The Associate Superintendent for Finance and Support Services, or designee, is responsible for implementing and monitoring this policy.

This policy and any related regulations shall be reviewed at least every five years and revised as needed.
