Student Safety

Use of Students to Move Dangerous Equipment

The purpose of this regulation is to ensure that employees do not place students in a perilous situation by permitting them to move dangerous equipment, such as televisions or audiovisual carts of the size shown on Attachment I.

Schools shall dispense to all staff the provisions in the attached Consumer Product Safety Alert issued by the U.S. Consumer Product Safety Commission. Schools shall incorporate it as part of their procedural guidelines.

The Associate Superintendent for Finance and Support Services (or designee) is responsible for implementing and monitoring this regulation.

The Associate Superintendent for Finance and Support Services (or designee) is responsible for reviewing this regulation in 2020.
Teachers Should Not Let Children Move or Play Near TV or Audiovisual Carts

The U.S. Consumer Product Safety Commission (CPSC) again warns the nation's school teachers not to allow children to move or play near TV or audiovisual carts because they can tip over and kill or seriously injure children.

CPSC has become aware of several incidents in schools involving the tip-over of loaded TV or audiovisual carts. Most of the carts were loaded with a TV set on the top shelf. Others were loaded with a projector, and in one incident the equipment was not known. All of the reported deaths involved tall slant-top carts (approximately 50 inches high). While available information indicates most accidents involved carts with slanted tops, CPSC is concerned about the safety of flat-topped carts as well.

In most of the cases, a teacher asked the young students (ranging in age from 7 to 11) to move a cart to another room. The cart overturned when it apparently hit a child's foot while being pulled or when the child stepped on the front of the cart for a ride. Typically, two children were moving the audiovisual cart, one child pulling from the front and the other child pushing from the back. The child in front was the one who was injured or killed. In one incident in which the cart was not being moved, a young girl suffered permanent brain damage when she climbed on or fell into a cart and the cart and TV fell on her.

To avoid injuries and deaths from TV or audiovisual cart tip-overs, follow these safety rules:

- Do not let children move a TV or audiovisual cart; only adults should move them.
- Do not allow anyone to step or ride on the TV or audiovisual cart, because this can cause it to overturn.
- Plan ahead when TV or other audiovisual equipment is needed, so it can be moved by an adult before and after class.
- Do not let children play near TV or audiovisual carts.
