

## Unified Basketball

Students of all abilities recently participated in unified basketball tournament games at various high schools. The unified program is an active and educational experience and provides a unique opportunity for students with and without disabilities to come together. Health and physical education educators and special education educators from across the county have been teaching and coaching students to prepare for this exciting event. Thank you to the educators, administrators, and students for an amazing opportunity to play unified basketball. This spring, students will prepare and participate in unified track and field events.
