

Dear Parent/Guardian,

This year, your child will be using either Lexia® Core5® Reading, or Lexia PowerUp Literacy to improve their literacy skills. Lexia's literacy programs provide personalized learning on critical reading and language skills, and deliver real-time performance data without stopping to administer a test. This research-proven, technology-based approach accelerates reading skills development and provides teachers data-driven action plans to help differentiate instruction for each student.

Here's how Lexia Core5 Reading and PowerUp Literacy work and how you can set your child up for success:

- Try to provide a quiet space for learning. Headphones can be helpful but aren't required.
- Your child begins their Lexia program at a starting point that fits his or her needs and then engages in online activities throughout the week.
- Online activities include direct instruction and immediate feedback as your child learns new skills.
- Students should complete the tasks on their own. That means no hints or tips from grown-ups, friends, or siblings! Progress and performance in the program are reported directly to teachers so that they can provide assistance when needed.
- Off-line activities are also used for practice and will be provided by your child's teacher
- Achievement certificates may be sent home to celebrate success and to show progress in the program.
- You can encourage and celebrate your child's progress via the Student Dashboard in Core5 or the student's Your Progress tile found on the PowerUp student dashboard.

Your student will access their Lexia program through their Clever dashboard. Directions for logging in to Clever will be provided by your school.

We hope you share in our excitement about this program! To learn more, visit www.LexiaLearning.com.

Sincerely,
