

Table 1 Occupational Therapy Activities BOARD 6

Occupational Therapy Activities BOARD 6

Vision	Grasp
Using flashlights, light boxes and high visual contrast materials is important. Some student may be able to benefit from the www.eyecanlearn.com website to work on tracking with the rabbit and ladybug.	Provide hand over hand assistance to grasp small items, to maintain and then release the items.

*All of these activities might not apply to your child, choose the ones that you like. If you feel that none of the activities are appropriate for your child, please contact your Occupational Therapist.
